After completing the registration process on the touch cloud website, you need to go to the [developer workbench](#) and do the following:

1. Login with the authentication key and secret of your account (you can get those once you login to the touch cloud website)
2. Create all the schemas included in schemas.zip
3. Create all the scripts included in scripts.zip
4. Set the permissions on the DefaultStore
 - a. SaveDocumentACL = anonymous
 - b. GetFileACL = anonymous
 - c. QueryACL = anonymous
5. Edit the script named social.twitter.integrate and set the variable named "authKey" to the authentication key of your account.
6. Create two concert documents
 - a. Required fields
 - i. schema = concert
 - ii. date = 2013-05-05
 - iii. ticketPriceLL = 100000
 - iv. title = Old stones rock bad
 - v. description = A very entertaining concert taking place in Beirut city.
 - vi. picture = <any image you have>
